**More than just a 3D CT training simulator**

Our OTS training system is a worldwide established brand for initial and recurrent training of X-ray machine operators. In cooperation with Battelle, an innovative American research institute, we now offer a **training solution for 3D CT-based scanners**. CT scanners are increasingly used at international airports thus 3D training is becoming more and more important. **Available now:** A manufacturer-independent user interface and manufacturer-specific user interfaces, such as the **Smiths Detection's HI-SCAN 6040 CTIX**, the **HI-SCAN 10080 XCT** and the **L3 Clearscan** for a realistic training experience tailored to your specific 3D equipment. Other user interfaces will follow.

**Sign up now for the SOTER RS Full-body scanner demo webinar!**

**UNCOVER ALL CONTRABAND WITHIN A MATTER OF SECONDS**

The Soter RS is a seriously trustworthy X-ray full-body scanner that allows you to uncover any hidden item imaginable within a matter of seconds. With the body scanner, no contraband will ever escape your attention! During this webinar, ODSecurity will go into detail about all benefits the system has to offer, including a demo of the system in action, how it operates, and the strategic and workflow improvements the system provides. During and after the webinar, there will be room for live interaction and a Q&A. Don't miss out! Sign up now for one of the listed timeslots on the 13th of January 2021.

**DETECT™ 1000**

Due to COVID-19, passengers are scared of touching surfaces because of infection risks. This patent pending disinfection station is as simple as it is clever. To give the passenger full control of the operation and dispel hygienic concerns, you place the **PENTA Scanner®** in the disinfection station: The proximity sensor detects movements on the scan window and triggers disinfection after every scan. The vaporizer nozzles spread out ultra-fine disinfection mist, which kills all surface microorganisms and dries immediately. Your Advantages: No complex rebuild, low investment, maximum effect.
